

[Tomoe Shokai Group Environmental Policy]

1. Basic philosophy

Taking advantage of its position as a trading company specializing in high-pressure gas and related products, the Tomoe Shokai Group is committed to environmental conservation and protection, including the effective use of resources, efforts to combat climate change, and the protection of biodiversity and ecosystems, in cooperation with stakeholders. By promoting environmental risk reduction activities through the operation and continuous improvement of its environmental management system, our group aims to provide safety and security to society and contribute to the realization of a sustainable society.

2. Action guidelines

(1) Contributing to environmental conservation

We will continue to contribute to the promotion of environmental conservation by providing environmentally friendly services and promoting sustainable consumption based on the following five themes:

1. Formation of a recycling-oriented society through waste reduction
2. Conservation of water resources
3. Prevention of air pollution
4. Consideration for biodiversity
5. Environmental impact of chemical substances

(2) Compliance with laws and regulations

All employees will actively work to comply with relevant laws, regulations and standards, and conduct business activities with sincerity while ensuring safety through self-monitoring.

(3) Ensuring safety

We will work to maintain and manage gas, chemicals, and other equipment and containers, and monitor leakage due to defects, deterioration, and human error to prevent environmental pollution and disasters, and to ensure the health and safety of our stakeholders.

(4) Reduction of environmental impact

We will monitor energy consumption and greenhouse gas emissions to conserve resources.

We will also strive to reduce greenhouse gas emissions and contribute to the realization of a decarbonized society by using environmentally friendly materials and equipment in our business activities.
